How It Works:

Improve Candidate experience, increase client satisfaction and remain in control of which videos are shared and archived.

- 1 Invite a Candidate to record a video interview with customizable questions using DeepHire.
- 2 See status updates within Clockwork on a person's record when a Candidate starts and completes their DeepHire interview.
- 3 Once completed, a link to the Candidate's video interview is saved on their record in Clockwork.
- 4 Access Candidate videos in Clockwork to archive, edit and share with your clients.
